AUTOCLEAR SECURITY INSPECTION SYSTEMS

PREMIUM DETECTION TECHNOLOGIES

X-RAY INSPECTION

With a range of sizes, our X-ray systems provide the most comprehensive screening solution for every application.

CROSS-ENHANCED BACKSCATTER

Our backscatter systems provide an instant image of concealed threats that feature more rapid and confident detection.

TRACE DETECTION

Developed and built by industry leaders in explosives and narcotics, our trace detection solutions are highly sensitive, selective, and user-friendly.

LASER DETECTION

Advanced Raman spectrometer for on-site detection of illicit substances such as explosives, narcotics, or food industrial chemicals (TICs).

SECURITY SCREENING KPOINT VAN

The Kpoint van is a mobile security screening solution that provides a comprehensive screening solution for every application. It features a range of screening technologies, including X-ray, backscatter, and trace detection, to provide a complete screening solution for every application.

HOW WE DO IT

We do things in a way that captures the essence of our esteemed clients and create a vibe that is truly unmatched.

BRIEFING

We collect a detailed brief from the client to understand their exact requirement for their specific event, timeframe and budget.

CONCEPT CREATION

Based on the brief collected from the client, we formulate a unique strategy and plan which is then sent to the client for further personalisation.

EXECUTION

After finalising the plan with our client, we turn that plan into reality and set up a dynamic event that stays head and shoulders above the rest.
